

# Under the Weather

Chris Young

Right there in the living room is our little lit-up tree  
We haven't even started wrapping hardly anything  
There's only one thing I need, yeah and you can bet  
Me being wrapped up with you is the best present I could get  
It's cold outside, you and I gotta  
go no where  
I could start a fire lay beside you all night right here  
The snow's comin' down and it won't be the only thing falling  
so let's stay here together under the weather  
Under the weather, under the weather  
Carols comin' through the radio  
People saying stay off the roads  
Kissin' you under the mistletoe  
That's a reason to stay at home  
Baby it's cold outside, you and I gotta go no where  
I could start a fire lay beside you all night right here  
The snow's comin' down and it won't be the only thing falling  
so let's stay here together under the weather  
I waited for this all year long  
Something about turning on  
Christmas lights for the first time  
Watchin' them shine in your eyes  
Baby it's cold outside, you and I gotta go no where  
I could start a fire lay beside you all night right here  
The snow's comin' down and it won't be the only thing falling  
so let's stay here together under the weather.  
Yeah under the weather, under the weather
