

# California Queen

## Wolfmother

Slipped off into the slip stream  
She's looking for the summer dream  
Came down from the mountain  
To find another machineRunning down all the by-ways  
Listen to all that she says  
Couldn't see very far  
Find out all that you areMy California Queen  
Fully air reconditioned  
Self-made man machine  
With a home made hydroponic  
Wait to find out what it meansMy California QueenStanding in front of the rainbow  
Could you tell me where do all the people go?  
Rising from the mystic haze  
Standing in front of all creationWith all their mystic ways  
They seem to control the days  
Somebody got to get behind it  
To find out all that it meansMy California Queen  
Oh tell me what it means  
My California Queen  
Standing in front of the rainbow  
Could you tell me where do all the people go?  
Rising from the mystic haze  
Standing in front of all creation
