

Long Way to Go (feat. Audio Adrenaline)

Young Noah

Oh we got a long way to go
There's no going back to the life we lived the life we use to know
We got a long way to go
I've given everything there's nothing left there's nothing left to lose Long way the wrong way
Feeling like I'm in a place way beyond grace
Looking in the mirror can't escape from my own face
Ran with the world now I'm running at my own pace
I got problems that's way to big you can't solve them
I want to get out of Sodom I'm stuck here down at the bottom
I gotta come out of all of these solemn
Scenes and chase dreams of freedom from these things
You know how it be though
When your team was counting on you and you miss the free throw
Now you feel like a failure and you can't help it but below
But you only a teen and you still feel like a zero
I woke up this morning feeling no peace disappointed
Trying to escape all these moments can't run away and disown it
I gotta past and I'm haunted want to be free and confronted
Gotta move on if I'm a get everything that I wanted want it?
Oh we got a long way to go
There's no going back to the life we lived the life we use to know
We got a long way to go
I've given everything there's nothing left there's nothing left to lose A feeling I can't describe
Never had so much peace in my mind it must be God
I smile without a reason to smile cause I'm alive
I ain't felt this good in a while I'm a survive
Man I see what you doing
I been there to I remember the ruin
I fell into pursuing everything you are doing
But there's light at the end to be free from your sin
But you gotta choose if you wanna move
Or stay glued to your point of views
Stay stuck with the black and blues
Cause the world a hit you hard leave you with a bruise
You can follow my lead you can go there with me
Just confess and be free
There is freedom indeed I'll supply every need
Are you ready to be are you ready to dream dreams
Oh we got a long way to go
There's no going back to the life we lived the life we use to know
We got a long way to go
I've given everything there's nothing left there's nothing left to lose

Oh we got a long way to go
There's no going back to the life we lived the life we use to know
I've given everything there's nothing left there's nothing left to lose
