

Human Nature (Great Good Fine OK Remix)

Paperwhite & Great Good Fine Ok

It hits me like a tidal wave
The walls begin to cave in
I thought that I could run away
But it's always with me
And I start to feel it Give into the energy
Get up off the pavement
There's no more escaping from human nature
I wanted to remedy
These animal behaviors
But there's no more escaping from human nature It started off quietly
I'm hearing it aloud now
And it's always right in front of me
But I missed it somehow
And I want to feel it
Give into the energy
Get up off the pavement
There's no more escaping from human nature
I wanted to remedy
These animal behaviors
But there's no more escaping from human nature We jump, we fall, we want it all
While screaming in my garden now
We need to know what will become
We dance, we're strong, we fear unknown
We want to grow, don't want to wake up alone
We can't admit when we're wrong
Then we won't live without love
Won't live without love
Give into the energy
Get up off the pavement
There's no more escaping from human nature
I wanted to remedy
These animal behaviors
But there's no more escaping from human nature
