

My God (feat. Weyes Blood)

The Killers

Mirage after mirage
Crawling back to your arms
Stay, stay
From your mouth to my heart
Stay, stay
From your mouth to my heart
Stay, stay Don't talk to me about forgiveness
My God, just look who's back in business
That weight that dragged you down
It has been made light
And I'm at the top of my lungs
'Cause big love cannot be understated
Don't push, control is overrated
I know that if we stick together
My God, it's like the weight has been lifted
Wipe the dust from my eyes
Wash my feet with your tears
My God
My God
From your mouth to my heart
Stay, stay Don't talk to me about forgiveness
My God, just look who's back in business
That weight that dragged you down
It has been made light
And I'm at the top of my lungs
'Cause big love cannot be understated
Don't push, control is overrated
I know that if we stick together
My God, it's like the weight has been lifted
The weight has been lifted
We finally let go
We let go of what holds our hearts in the cold
The weight has been lifted Don't talk to me about forgiveness
My God, just look who's back in business
That weight we lugged around
It has been made light
And I'm at the top of my lungs
'Cause big love cannot be understated
Don't push, control is overrated
I know that if we stick together
My God, it's like the weight has been lifted
It's like the weight has been lifted

It's like the weight has been lifted
