

Still Love You (feat. Lovespeake)

Dada

Heart in empty space,
and my shadow start to fade
I must be losing faith,
but I know that I still love you
Trying to replay, do whatever rest may take
I can't hardly stay awake, cuz I know that I still love you
Cuz we fell in love, only seventeen
Right and now, need you here with me
I can fall in love, with someone new
It's only better, when I'm with you
I know that I still love you
You, You, You I can see your face
It's the way you looked at me
Start to feel the pain
Cuz I know that I still love you
Baby I can change,
I don't want to feel this way
Trying to explain,
how I know that I still love you
Cuz we fell in love, only seventeen
Right and now, need you here with me
I can fall in love, with someone new
It's only better, when I'm with you
I know that I still love you
You, You, You
I know that I still love you
I know that I still love you
I know that I still love you
You, You, You
