

# We Belong (Tritonal Air Up There Remix)

Ferry Corsten

Days. Days. Days  
Stealing secret moments  
Breathing in the summer sun  
As the sea of changes  
Wash ashore Days  
In the great wide open  
Theres so much to catch the eye  
Your beauty, Shade and light  
Shade and light Quite Witness to forever  
In my silene i keep holding on  
I am waiting 'til forever  
And i understand where we belong  
Quite Witness to forever  
In my silene i keep holding on  
I am waiting 'til forever  
And i understand where we belong And i understand where we belong  
And i understand where we belong  
And i understand where we belong  
And i understand where we belong Days  
In the great wide open  
Theres so much to catch the eye  
Your beauty, Shade of light  
Shade of light Quite Witness to forever  
In my silene i keep holding on  
I am waiting 'til forever  
And i understand where we belong  
Quite Witness to forever  
In my silene i keep holding on  
I am waiting 'til forever  
And i understand where we belong [Stand where we be, stand where we be, stand where we  
be...] Quite Witness to forever  
In my silene i keep holding on  
I am waiting 'til forever  
And i understand where we belong Quite Witness to forever  
In my silene i keep holding on  
I am waiting 'til forever  
And i understand where we belong And i understand where we belong  
And i understand where we belong
