

# Stars Come Out

Zedd

You light me up  
You bring the crowd  
I think about this  
Every time the stars come out You light me up  
You chase the clouds  
I think about this  
Every time the stars come out Every time the stars come out  
Every time the stars come out  
Every time the stars come out  
Every time the stars come out  
Every time the stars come You light me up  
You bring the crowd  
I think about this  
Every time the stars come out You light me up  
You chase the clouds  
I think about this  
Every time the stars come out Every time the stars come out  
Every time the stars come out  
Every time the stars come out  
Every time the stars come out Every time the stars come  
You light me up  
Every time the stars come  
You bring the crowd  
Every time the stars come out  
You light me up  
Every time the stars come  
You chase the clouds  
Every time the stars come out  
Every time the stars come out  
Every time the stars come out  
Every time the stars come out  
Every time the stars come out
