

# Where There Is Light

## VNV Nation

The carousel begins to slow  
I'll take my chances  
So far removed I'll fail to see  
The recklessness I've shown  
In all my words and deeds  
The good in other souls  
I never fail to see Can you see the light  
As far as the eyes can see  
From this point above the world  
Where mortals dare their destiny  
As it radiates  
May I witness open-eyed  
Let me remain where there is light  
In want of courage  
It is as a shield for me  
In want of hope  
It reassures and carries me  
As it radiates  
May I witness open-eyed  
Let me remain where there is light Letting go was never easy  
Risking all for what I wanted  
Never needed  
Deliberated whether I should  
Serve the cause of greater things  
As we moved worlds apart  
Can you see the light  
As far as the eyes can see  
From this point above the world  
Where mortals dare their destiny  
As it radiates  
May I witness open-eyed  
Let me remain where there is light The greatest words  
Would still fail me now  
These emotions I cannot describe  
I want to be where  
I don't need to hide myself  
And remain there  
Until the end of time The gods play games  
With mortal hearts  
As the carousel goes round  
As I looked on  
I saw the crowds who gathered

Walk away Can you see the light  
As far as the eyes can see  
From this point above the world  
Where mortals dare their destiny  
As it radiates  
May I witness open-eyed  
Let me remain where there is light  
In want of courage  
It is as a shield for me  
In want of hope  
It reassures and carries me  
As it radiates  
May I witness open-eyed  
Let me remain where there is light
