

Life Goes On (Alice Ivy Remix)

E^ST

Momentary
Temporary, transient
Impermanent, fugitive
Short-lived
Fleeting
There was something great about you
Something that'll never be the same without you
Something that I'm always gonna miss
Guess that's how it is
We pass each other by
And we don't share our time for long
We have a change of mind
The moment ends and life goes on
Life goes on
We go on by ourselves
And hope that we won't be for long
Then we find someone else
It starts again
And life goes on
I should let go
But I think of you more than you know
I think of you more than you know
And we weren't a big deal
And you've probably forgotten me
You seem happy
Guess that I am too
But I can't forget about you
There was something great about you
Something that'll never be the same without you
Something that I'm always gonna miss
Guess that's how it is
There was something great about you
Something that'll never be the same without you
Something that I'm always gonna miss
Guess that's how it is
We pass each other by
And we don't share our time for long
We have a change of mind
The moment ends and life goes on
Life goes on
We go on by ourselves
And hope that we won't be for long
Then we find someone else
It starts again
And life goes on
I should let go
But I think of you more than you know
I think of you more than you know
Momentary
Temporary, transient
Impermanent, fugitive

Short-lived
