

There's a Fire

Ok Go

Stop getting me off track
I mean it, there's a problem here
This time it is for, it is for, it is for real
How can I make myself more clear? I never say quite what I mean
And never mean quite what I say
And how did that get out of me
And what the hell did I mean to say? This time it is for real
This is a real emergency
This time I swear it is the, it is the, it is the truth
This must be dealt with urgently
I never say quite what I mean
And never mean quite what I say
And how did that get out of me
And what the hell did I mean to say? There's a fire, there's a fire I really mean it now
This time I swear I have not lied
This isn't like the, like the, like the last time
I swear to God I have not lied I never say quite what I mean
And never mean quite what I say
And how did that get out of me
And what the hell did I mean to say?
There's a fire, there's a fire
There's a fire, there's a fire
There's a fire, there's a fire
There's a fire, there's a fire
There's a fire, there's a fire
There's a fire, there's a fire
There's a fire, there's a fire
There's a fire, there's a fire
There's a fire, there's a fire
There's a fire, there's a fire
There's, woah
