

Never

All The Luck In The World

We wish we wish and all we do is wait
We hope we hope but never do we pray
Cause we know there's not much to say
We grow we grow but never do we change
We mould we fold we always rearrange a dream
When it is not a success
It's gotta be this one I know it is I know it is
It's this one I know it is I know it is
It's this one, it's you
It's gotta be this one I know it is I know it is
It's this one I know it is I know it is
It's this one, it's you
Now and then I think of what you said
And it eats me up running through my head
So just beat me up so I can feel your pain
Know, I know that you do think of me
Not as a lesson learned but a fond memory
But I wish I never knew you, wish I never asked your name
It's gotta be this one I know it is I know it is
It's this one I know it is I know it is
It's this one, it's you
It's gotta be this one I know it is I know it is
It's this one I know it is I know it is
It's this one, it's you
I know I know it's difficult, I know I know it's difficult
We've grown we've grown so far apart
But these ships these ships don't sail away
They wait they wait for another day
And they will float again
Oh no we're lost for words again
Now and then I think of what you said
And it eats me up running through my head
So just beat me up so I can feel your pain
Know, I know that you do think of me
Not as a lesson learned but a fond memory
But I wish I never knew you, wish I never asked your name
