

# Outer Space

[Ace Frehley](#)

You said you wanted my love  
To be a part of your game  
But when I came from above  
I looked around, but you turned away  
But now you're scratching and crawling  
Your way up from the grave  
You should have stayed in the dirt, girl  
It's like I told you  
It's like I told you, I came from outer space  
That's how I know your name  
It's like I told you, I came from outer space  
I want to take you away  
You took a drink of my sweet love  
And then the poison took  
You hooked me up to your sick machine  
And then I blew you up  
You were a one in a billion  
Before the button was pushed  
You should have stayed in the dirt, girl  
It's like I told you  
It's like I told you, I came from outer space  
That's how I know your name  
I'm sick and tired of the human race  
I want to take you away  
It's like I told you, I came from outer space  
That's how I know your name  
I'm sick and tired of the human race  
I want you by my side  
I want to take you to heaven  
Take you away from this hell  
I want to take you to heaven  
Take you away from this hell  
It's like I told you, I came from outer space  
That's how I know your name  
I'm sick and tired of the human race  
I want to take you away  
It's like I told you, I came from outer space  
That's how I know your name  
I've given up on the human race  
I'm gonna blow 'em away  
So let me take you to heaven  
Take you away from this hell  
I want to take you to heaven  
Take you away from this hell  
I want to take you to heaven  
Take you away from this hell  
The earth is rollin' a seven  
This place is going to be fried
