

# Bartender

## Lady Antebellum

8 o'clock on Friday night I'm still at home  
All my girls just keep on blowing up my phone  
Saying come on he ain't worth the pain  
Do what you gotta do to forget his name Now there's only one thing left for me to do  
Slip on my favorite dress and sky high leather boots  
Check the mirror one last time  
And kiss the past goodbye What I'm really needing now Is a double shot of Crown  
Chase that disco ball around 'Til I don't remember  
Go until they cut me off Wanna get a little lost  
In the noise, in the lights Hey bartender pour 'em hot tonight  
'Til the party and the music and the truth collide  
Bring it 'til his memory fades away Hey bartender  
Tonight I'll let a stranger pull me on the floor  
Spin me 'round and let him buy a couple more  
But before it goes too far I'll let him down easy  
'Cause tonight it's all about  
Dancing with my girls to the DJ  
Put that song on replay What I'm really needing now Is a double shot of Crown  
Chase that disco ball around 'Til I don't remember  
Go until they cut me off Wanna get a little lost  
In the noise, in the lights Hey bartender pour 'em hot tonight  
'Til the party and the music and the truth collide  
Bring it 'til his memory fades away Hey bartender I'm feeling that buzz I'm ready to rock  
Ain't no way I'm gonna tell you to stop  
So pour that thing up to the top  
I'm coming in hot Hey bartender  
What I'm really needing now Is a double shot of Crown  
Chase that disco ball around 'Til I don't remember  
Go until they cut me off Wanna get a little lost  
In the noise, in the lights Hey bartender pour 'em hot tonight  
'Til the party and the music and the truth collide  
Bring it 'til his memory fades away  
Hey bartender Hey bartender
