

Record Shop

Weston

That could be you that should be us
I listen well but talk too much
I wanna spend my time around
The record store right by your house I wanna talk but I won't tell
I really hate what I do well
I don't care much except about
The record store right by your house The record store right by your house
The record store right by your house right by your house
Right by your house the pavement record just came out oh wow
Are you in love? are you alone?
I do little with what I know
The only things I care about
Are you and my guitar
And the corner record store right by your house
