

# Everything Is You

## Eli Young Band

Eternal flame came on the radio  
And I remember how you loved it so  
Memories sneak up on me, wherever I go  
A car like you used to drive  
Pulled beside me today at the light  
Chances to break and cry wherever I go  
And you want me to be strong, any less just shows I'm  
weak  
How'd ya turn so cold, where's the girl I used to know  
Chorus:  
And it's love and hate and all these emotions  
I never thought that you'd be going  
Now I'm just going through the motions  
Where everything is you, everything is you  
An inside joke comes to mind  
We'd wear them out all the time  
Memories sneak up on me wherever I go  
And it seems you've disappeared, though you're not  
that far away  
Please tell me it's not true, I didn't mean that much to you  
And it's love and hate and all these  
emotions  
I never thought that you'd be going  
Now I'm just going through the motions  
Where everything is you, everything is you  
What did I do wrong, nothing I treated you like an  
angel  
What did I do wrong, nothing I treated you like an angel  
What did I do wrong, nothing I treated you like an angel  
I treated you like an angel  
And it's love and hate and all these emotions  
I never thought that you'd be going  
Now I'm just going through the motions  
Where everything is you, everything is you  
I treated you like an angel.
