

Hand On Your Gun

Lowkey

weapons for all occasions
and everyone got excited about the technology
and i guess its was pretty incredible watching a missile
fly down an air vent pretty unbelievable
but couldn't we feasibly use that same technology
to shoot food at hungry people?
this one is dedicated to the suit wearing arms dealersto the champagne sipping depleted
uranium droppers
keep your hand on your gun don't you trust anyone
keep your hand on your gun don't you trust anyoneFirst in my scope is BAE Systems
Specialize in killing people from a distance
Power is a drug and they feed the addictionImmediate deletion of people's existenceWho says
what is and what isn't legitimate resistance
To push these buttons you don't need a brave heart
State of the art darts leave more than your face scarredYou might impress an A&R with your
fake barsCause you probably think Rolls Royce only make carsThis is for the colonizers turned
bomb-providers
Take this beef all the way back to Oppenheimer
They call it warfare but your wars aren't fairIf they were there'd be suicide bombers in Arms
Fairs
On a scam for the funds, they will mangle your son
If you try to speak out they will stamp on your tongue
To your land they will come till you stand up as onekeep your hand on your gun don't you trust
anyone
keep your hand on your gun don't you trust anyone
Next in my scope is Lockheed Martin
They will tell you when the bombs need blastin'
Don't think, just listen to the songs, keep dancin'
Do they really want us to have our own brains
Who do you think is really running Guantanamo Bay
And it might be sensitive but I'll mention it
Who do you think has got us filling out the censuses
Who do you think is handing out the sentences
This ain't the BBC so there's no censorship
Heard of many mercenaries gettin' with the clever pimp
Not a gun seller but none's better than Erik Prince
Make money off many things, mainly it's crime
This one is dedicated to the Raytheon 9
On a scam for the funds, they will mangle your son
If you try to speak out they will stamp on your tongue
To your land they will come till you stand up as one
It's begunkeep your hand on your gun don't you trust anyone

keep your hand on your gun don't you trust anyone
