

# Black Balloons

## Local Natives

I can see the words as they come out your mouth  
Black balloons fall into a poison cloud Hold me down and bring me back up again  
Until I can't, I can't tell the difference Circling vultures always overhead  
Force your hand  
Every day is life or death Hold me down and bring me back up again  
Until I can't, I can't tell the difference Now you've changed your name  
Do they still ask you twice? I look on a friend that's flashing for a box  
Play your part swear you're who you say you are  
You hold me down and bring me back up again  
Until I can't, I can't tell the difference
