

# Supernova

Caitlyn Smith

Well, you grow up, pack it all up  
In a hand-me-down car  
Throw out a wave and you just can't wait  
For your life to start  
You move miles away from your parents  
And then you try so hard not to be like them  
But then it hits you one day  
That you miss them like hell  
You want nothing more than to go home again  
Time is like a shooting star  
A supernova in the dark  
You'd do anything to make it last  
But it all goes by so fast  
Curly hair and matchbox cars  
Leave the lights on 'cause you're afraid of the dark  
Reaching for my hand when you cross the road  
You are my sunshine and right now you're all mine  
I don't know how I'll ever let you go  
Time is like a shooting star  
A supernova in the dark  
You'd do anything to make it last  
But it all goes by so fast  
Be right here next to me now  
And we'll let this world spin round and round  
Kiss me and let's just talk here for a while  
Time is like a shooting star  
A supernova in the dark  
You'd do anything to make it last  
But it all goes by so fast
