

# Starry Eyes

## Young Bombs

Our ground was always shaking, lost in the height  
Those years of running got me stuck in cement 'Cause all the things I never shoulda said  
Made me someone that I never shoulda been  
Take me back when it was only you and I  
Baby, look up at the sky Open up your starry eyes  
So bright, so high, let's take our time  
All day and all night, till sunrise  
Open up your starry eyes  
So bright, so high, don't say goodbye  
All day and all night, till sunrise  
Open up your starry eyes  
Open up your starry eyes  
All day and all night, till sunrise  
Open up your starry eyes So much I wanna tell ya  
So much I miss  
It's on the tip of my tongue  
It's on my lips So kiss me like you never did before, baby  
Say you want me but I want you more  
Take me back when it was only you and I  
Baby, look up at the sky Open up your starry eyes  
So bright, so high, let's take our time  
All day and all night, till sunrise  
Open up your starry eyes  
So bright, so high, don't say goodbye  
All day and all night, till sunrise  
Open up your starry eyes  
Open up your starry eyes  
So bright, so high, don't say goodbye  
All day and all night, till sunrise  
Open up your starry eyes  
Open up your starry eyes
