

Number 1 (feat. Glenn Lewis)

Slakah the Beatchild

Can't recall needing the right words to say more than today
Saw your face turned my day around
Let me return the favor
Just need some time
Starting tonight
I'll change your life
Baby no doubt for the better
It's something I hope you see like me in the long run
Girl I'm not the one
Life's too short for games
Not that I never use to play that way
It's just that moments come & happenonce
Could & should's the wrong side of love Love you one thousand ways girl just to be your number
1
This thing right here, just to make it clear my dear
Love you one thousand ways girl just to be your number 1
It's such a rush, feel it in my touch too much Love you one thousand ways girl just to be your
number 1
This thing right here, just to make it clear my dear Love you one thousand ways girl just to be
your number 1
It's such a rush, feel it in my touch too much Girl let this feeling just take us away
Let go and leave our past behind
Knowing what it takes to find
Something only experience of pain
Would show what matters most
Embrace our time
And you by candle light
Let's make a toast
Nothing's for sure
But our future seems bright
Excuse me if I seem too serious
Just feels good being around you
I want to make it last girl how 'bout you?
Love you one thousand ways girl just to be your number 1
This thing right here, just to make it clear my dear Love you one thousand ways girl just to be
your number 1
It's such a rush, feel it in my touch too much Love you one thousand ways girl just to be your
number 1
This thing right here, just to make it clear my dear Love you one thousand ways girl just to be
your number 1
It's such a rush, feel it in my touch too much Wanna be your number 1, number 1
