

# It's On

## Rock Star Supernova

I feel suspended, lifeless  
Going through the motions  
Your inside, outside  
Waiting for the cause  
Desperate measures  
But it don't measure nothing  
All the pain left inside  
There's nowhere left to fall All your spaces  
Darken places  
Come out  
From it all  
Let it shine on  
Even when the day is done and all the light is gone  
Let it shine on  
You're running high but dark inside  
What little light has left you and shines on Talking senseless  
Screaming from the benches  
Looking forward  
Not to fall behind  
Look through lenses  
Nothing ever cleanses  
Your rained out visions  
From a cloudy mind All your spaces  
Darkened places  
Come out  
From it all  
Let it shine on  
Even when the day is done and all the light is gone  
Let it shine on  
You're running high but dark inside  
What little light has left you and shines on I don't ever want to fade away  
A burned out record that I can't play  
Don't let me make the same mistakes  
That you have made before  
Nothing changes  
Can't you face it  
After all Let it shine on  
Even when the day is done and all the light is gone  
Let it shine on  
You're running high but dark inside  
What little light has left you and shines on
