

When the Night Comes

Jeff Lynne's ELO

When the night comes, that's when I think of you
When the night comes, I get midnight blue But what can I say, when the night comes to stay
(When the night comes), and everybody's gone
(When the night comes), and I'm here all alone
(When the night comes), every night that's when I think of you Now's the time, I see the twilight
coming on
Now's the time, pretty soon they'll all be gone But where will I be, when the night comes to me
(When the night comes), and everybody's gone
(When the night comes), and I'm here all alone
(When the night comes), every night that's when I think of you
But what can I say, when the night comes to stay
(When the night comes), and everybody's gone
(When the night comes), and I'm here all alone
(When the night comes), every night that's when I think of you
(When the night comes), and everybody's gone
(When the night comes), and I'm here all alone
(When the night comes), every night that's when I think of you (When the night comes), and
everybody's gone...
